

Would you spend
one percent
of your revenues...

to protect the
other ninety-nine
percent?

Like today's fastest-growing companies, you look to technology for operational efficiencies, productivity boosts, competitive advantage and improved communication. PCs, networks and servers are your critical tools. You rely on them to operate flawlessly because...

One computer problem could bring your business to a halt—order processing frozen, new orders locked out, customer data inaccessible, financial records and inventory unavailable. Downtime translates into idle

employees, irate customers and missed sales. And that's lost revenue.

Buying brand-name equipment is not enough to guarantee reliability. Only preemptive care can ensure that your computer systems deliver on their promise. Digital Barracuda™ performs solid installations, schedules regular system monitoring and diagnostics and sets strong security protocols to deliver the reliability you expect.

digital barracuda™

Don't gamble with your business

The computer professionals at Digital Barracuda will protect your company for less than one percent of your revenue. That's a whole year for less than you'd spend on emergency help or hiring a full-time, in-house computer person.

As your full-service partner, we will help you accomplish today's goals and reach tomorrow's dreams by:

- Making your computers run at their very best every day
- Identifying and fixing problems before they can affect your business
- Setting and deploying stringent security plans against viruses, hackers, even employee sabotage
- Building and testing effective disaster recovery strategies
- Listening to your goals and translating them into solutions that will grow with your business

- Designing secure wireless networks
- Designing networks for every kind of business and data-access requirement—down the hall, around the city or across the country
- Making the best recommendations on hardware and getting you the lowest prices
- Taking on the headaches of dealing with manufacturers
- Creating comprehensive data protection plans
- Managing technology projects
- Hosting data, websites, email or virtual private networks to your specifications

Digital Barracuda is that partner. We're a fast-growing, local company of professional people who appreciate firsthand the challenges you face as you rely increasingly on technology. And we are prepared to stand between you and business disaster.

When you partner with Digital Barracuda, we monitor and maintain your systems on a regular schedule. We identify and stop trouble before it can impact your business. We keep you working, and we do it at a price you can afford.

Our people are trained and certified in the solutions businesses are using today and planning to add tomorrow.

With Digital Barracuda as your partner, you'll get the peace of mind that your computer systems are serving your business well. It's partnership with a professional edge.

The Partnership Edge

The right partner makes all the difference. It's more than a business relationship. It's a person who has a vested interest in your success and takes time to listen and understand what you need to succeed...and keep growing.

Are you ready for a professional partner?

You are if you check any of the following:

- We rely on our computers every day
- Our employees are on the Internet and use email daily
- Our customers are our most important asset
- Our employees need to focus on business... not the availability of our network
- We expect excellent service and support that's affordable
- We need technology solutions that will grow with our business
- It's critical to keep our systems and data secure from viruses, hackers and unauthorized access
- Dealing with hardware and software vendors is a headache
- We are a fast-growing business with big plans for the future
- We believe technology can be a competitive advantage in business
- We need to reduce downtime through better preventative maintenance
